

DAVID GIDEON

Senior Solutions Architect • DevSecOps & Platform Engineering • AWS Certified SA – Professional

Remote-first • Lagos, Nigeria • Open to relocation (EMEA & Australia)

ocheworks@gmail.com | +234 813 877 6065 | linkedin.com/in/gideonodavid | github.com/OcheOps | ocheverse.ng

PROFESSIONAL SUMMARY

Solutions Architect and DevSecOps engineer with 5+ years building secure, multi-cloud platforms across AWS, Azure, GCP, and Oracle Cloud. AWS Certified Solutions Architect – Professional, currently consulting through an AWS Advanced Partner across fintech, government, healthtech, FMCG, and edtech clients. Deep experience in regulated financial services (SEC and CBN-regulated systems at Coronation Group) and critical national infrastructure (Nigerian Ports Authority). Ships production tooling in Go — including Shipguard, a policy-driven CI/CD security gate used internally to enforce DevSecOps controls. Open to senior and staff roles, fully remote or with visa sponsorship for EMEA and Australia.

SIGNATURE PROJECTS & OPEN SOURCE

- **Shipguard** — Policy-driven container deployment engine (Go). Converts vulnerability scan output into DEPLOY / WARN / BLOCK decisions inside CI/CD pipelines; in active internal production use. github.com/OcheOps/shipguard
- **Clyra** — Production platform project. useclyra.com
- **Homelab Observability** — Full-stack Prometheus / Grafana / Netdata / ntopng observability stack with custom Go traffic-monitoring and auto-throttle engine. github.com/OcheOps/homelab-observability
- **Teams Quiet Hours** — Microsoft Teams automation utility. github.com/OcheOps/teams-quiet-hours
- **Passy CLI** — Cross-platform terminal password manager in Go with APT packaging and release pipelines. github.com/OcheOps/passy
- GitHub: 170+ repositories, 213+ stars, GitHub Developer Program member, Public Sponsor of open-source maintainers. Paths-in-TECH (21★) — open guide helping early-career engineers in Africa break into tech.

PROFESSIONAL EXPERIENCE

DevSecOps Engineer (Full-time) — Fusion Intelligence

Jan 2024 – Present

- Secured 100+ CI/CD pipelines across cloud and application environments by integrating SAST, DAST, dependency scanning, and policy-as-code gates into the standard release workflow used by 20+ engineers.
- Cut average deployment security review time from days to minutes by automating vulnerability triage with the in-house Shipguard policy engine, which governs deploy and block decisions for internal container releases.
- Stood up the full observability stack (Prometheus, Grafana, ELK) and instrumented production services, reducing mean-time-to-detect for incidents and enabling proactive alerting across monitored workloads.
- Reduced cloud infrastructure spend by ~30% (~ \$2,000/month → \$1,400/month) through right-sizing, autoscaling policies, lifecycle rules, and removal of orphaned resources.
- Lead secure cloud migration and infrastructure automation initiatives end-to-end; act as the team's security lead enforcing secure-SDLC practices across application, infrastructure, and pipeline layers.

Solutions Architect (Consulting, concurrent) — Cumulus HQ — AWS Advanced Partner *Jan 2026 – Present*

- Lead solutions architect across 7 client engagements spanning fintech, government, FMCG, healthtech, and edtech, designing production AWS architectures using Lambda, API Gateway, S3, CloudFront, and Bedrock.
- Designed and shipped a Bedrock-based RAG AI system for an FMCG client, automating internal knowledge workflows and contributing to ~\$3,000 in measurable operational savings on the initial deployment.
- Led infrastructure migrations and system redesigns using CloudFormation and Terraform; established CI/CD pipelines, deployment strategies, and infrastructure standards adopted across engagements.
- Provided technical leadership and system-design guidance to internal and client engineering teams, including international team members across multiple time zones.

Solutions Architect & Engineering Lead (Consulting, concurrent) — Metcore Digital Technologies *Jan 2026 – Present*

- Provide architecture and platform engineering leadership across products built by a 20-engineer team, owning standards for cloud architecture, CI/CD, and infrastructure-as-code.
- Architected scalable backend and distributed systems across multiple client products; reviewed and unblocked engineering teams on system design, deployment, and infrastructure decisions.

Solutions Architect / DevOps Engineer (Full-time) — Coronation Group *Jan 2025 – Jan 2026*

- Owned hybrid-cloud architecture across AWS and Azure for a 30-engineer financial services organization regulated under SEC, CBN, and adjacent Nigerian financial regulatory frameworks.
- Reduced deployment cycle time by ~75% (from ~3 hours to ~45 minutes) by standardizing infrastructure across 20+ environments using Terraform and Pulumi and automating release gates.
- Cut hybrid-cloud spend by ~50% (~\$6,000/month → \$3,000/month) through governance, rightsizing, reserved capacity strategy, and removal of duplicated environments.
- Designed the secure networking baseline: VPC segmentation, IAM boundary policies, and IPsec VPN interconnects between AWS, Azure, and on-prem financial systems.
- Led a sub-team of 3 engineers within the broader platform group; introduced platform standards adopted across the engineering organization.

System Network Administrator — Nigerian Ports Authority *Nov 2023 – Oct 2024*

- Maintained high-availability network and server infrastructure across multi-site data centers supporting critical national port operations.
- Automated configuration management with Ansible across the server estate; hardened firewall and VPN perimeter security following industry baselines.

DevOps Engineer (Contract) — Redeemer's University *Oct 2022 – Aug 2023*

- Containerized backend systems using Docker and Kubernetes; built reusable Terraform modules adopted as the provisioning standard for the engineering team.

Software Engineer Intern — Hoshis Tech Corp *May 2022 – Nov 2022*

- Built scalable microservices in NestJS; integrated third-party APIs improving end-to-end throughput by ~30%.

Early Career — Backend & Full-stack Engineer — Wejapa, Gokada (Backend Intern), and others *2020 – 2022*

- Backend and full-stack engineering across Nigerian startups and logistics platforms; foundation for transition into infrastructure and platform engineering.

Independent Consulting (selected) — Telus and other international engagements *Selected engagements*

- Independent technical contracts including engagements with international teams (e.g., Telus) and additional AWS Partner client work delivered through Cumulus HQ and Metcore.

TECHNICAL EXPERTISE

Cloud: AWS, Azure, GCP, Oracle Cloud • Multi-cloud & hybrid-cloud architecture

Infra & IaC: Kubernetes, Docker, Terraform, Pulumi, OpenTofu, Ansible, Helm, GitOps

CI/CD: GitHub Actions, Jenkins, GitLab CI, Azure DevOps

Observability & SRE: Prometheus, Grafana, ELK, Netdata, ntopng, SLO/SLA design, incident response

Security & DevSecOps: SAST, DAST, policy-as-code, secure SDLC, IAM, secrets management, CEH, ISO/IEC 27001 fundamentals

Networking: VPC design, IPsec VPN, hybrid interconnects, segmentation, zero-trust patterns

Languages: Go (production tooling), Python, JavaScript / TypeScript, Bash

AI / Platform: AWS Bedrock, RAG systems, platform engineering, FinOps & cost optimization

CERTIFICATIONS

- AWS Certified Solutions Architect – Professional
- Google Professional Cloud Architect
- Microsoft Azure Solutions Architect Expert (AZ-305)
- Microsoft Azure Network Engineer Associate
- Oracle Cloud Infrastructure Architect Professional
- Oracle Cloud Infrastructure Multicloud Architect Professional
- Certified Ethical Hacker (CEH)
- Kubernetes & Cloud Native Associate (KCNA)

Additional: AWS Solutions Architect – Associate, AWS Partner Technical Accredited, Azure Administrator (AZ-104), Azure Developer (AZ-204), Oracle Cloud Infrastructure 2025 Foundations Associate, ISO/IEC 27001 Information Security Associate, Gremlin Chaos Engineering Practitioner, Linux Foundation (Kubernetes, Cilium, GitOps, OpenTofu), DevOps-as-a-Service (DAAS) Cohort 3.

WRITING, COMMUNITY & MENTORSHIP

- Technical blog at ocheverse.ng/blog — infrastructure, DevOps, and platform engineering writing.
- Author of Paths-in-TECH (21★) — open guide supporting early-career engineers entering tech in Africa.
- Internal speaker — regular technical talks across client and employer engineering teams.
- Mentor to engineers at Metcore (20-engineer team) and across consulting engagements.
- Open-source contributor (FreeOps, Harbor, published NPM packages).

EDUCATION

B.Sc. Computer Science — Redeemer's University

2019 – 2023
